

## iPad Settings when using Success Academy Online

In order to use Success Academy Online on your iPad, you must make two setting changes to the Safari browser

On your iPad's main screen, select the system setting icon

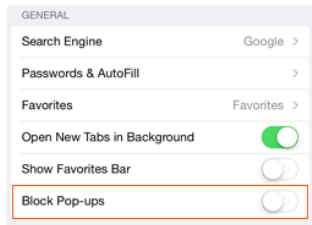

Once in settings, select Safari in the left column : you may need to scroll down

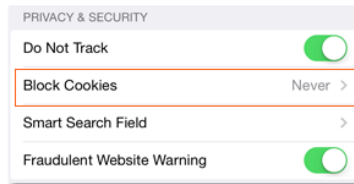

Once Safari is selected, located in the right pane are the Safari settings.

Under GENERAL, ensure Block Pop-ups is turned off by ensuring the slider button is to the left. Note: Green color on the slider button means ON - there should be no green color on slider button.

In the privacy and security section, ensure that Block Cookies is set to NEVER. If your setting says something other than NEVER - simply click on the word to the right of Block Cookies and Select NEVER from the list.

The iPad should always be in the vertical position. Using the iPad horizontally may prohibit you from accessing controls in the online training courses.
